WHEREAS, the cost of that disposal and treatment has been increasing, especially taking into account the necessity of replacement of the aging wastewater disposal system in the City; and,

WHEREAS, that study has been completed and the results of the study, together with the recommendation by the consultants, having been presented to Council, and Council having fully considered the study and the recommendations; and,

WHEREAS, the Council finds that it is in the best interest of the City to amend the wastewater rates to reflect a series of increases over the following four years as provided in the amendments presented herein in lieu of a large singular increase; and,
